SUPERSTORE SALES ANALYSIS

DATA ANALYST INTERNSHIP - TASK 2

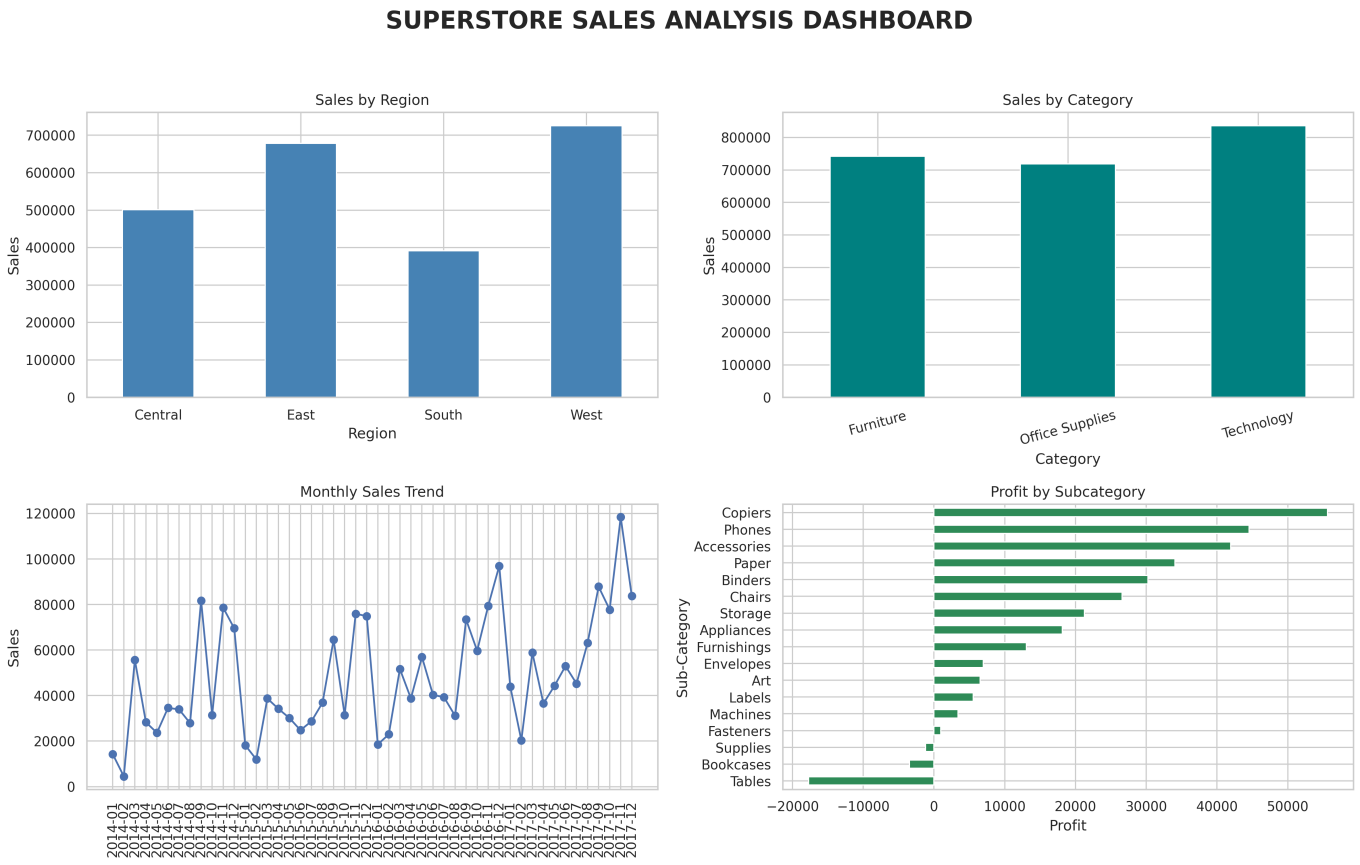

1. PROJECT INTRODUCTION

This project analyzes Superstore sales data using Python, Pandas, Matplotlib and Seaborn. The objective is to identify business trends, sales performance and profitability insights.

2. DATASET OVERVIEW

Metric	Value
Total Records	9,994
Total Columns	10
Total Sales	$2,297,200.86
Total Profit	$286,397.02
Total Quantity	37,873
Profit Margin	12.47%

3. SALES DASHBOARD

4. KEY BUSINESS INSIGHTS

• Highest revenue region: West

• Highest revenue category: Technology

• Most profitable subcategory: Copiers

• Lowest-profit subcategory: Tables

• Leading customer segment: Consumer

• Best sales month: 2017-11

• Lowest sales month: 2014-02

• Overall profit margin: 12.47%

5. BUSINESS RECOMMENDATIONS

• Study successful strategies in the West region.

• Evaluate opportunities in Technology products.

• Review pricing and costs associated with Tables.

• Strengthen Consumer customer retention.

• Plan inventory around high-sales periods.

6. CONCLUSION

The analysis provides valuable insights into regional performance, product categories, customer segments and profitability. These findings can support informed business decisions and improve sales performance.
